

Scrappy the Turtle and his Eco-Friends are here to teach you about the importance of taking good care of our planet. That means using our resources wisely and keeping the environment clean. We can start by recycling products to create less waste. You can recycle cans, plastic, cardboard, metals and more at Metro Recycling.

Scrappy and his eco-friends need you!

Everything you do to help the environment makes a big difference. Recycle paper, plastic, aluminum cans, metals and more, whenever you can. You can also plant trees, flowers and other plants, or you and your family can create your own compost pile in your yard.

To learn more about recycling visit our website at www.wheredoirecycle.com or talk with your teacher or group leader about scheduling a field trip to Metro's recycling facilities. You can also schedule a class visit by one of our recycling educators.
